TORNADO SAFETY INFORMATION

- TORNADO WATCH means tornadoes are expected to develop.
- TORNADO WARNING means a tornado has actually been sighted or indicated by weather radar. Seek safe inside shelter and stay away from windows.
- Listen to a battery operated radio or television for further advisories.
- If you are in an office building, dormitory, or other multi-story structure, go to the interior hallways on a lower floor, preferably the basement. Avoid auditoriums and gymnasiums or other structures with wide, free-span roofs.
- If you are outside, listen for the tornado warning sirens, and take cover immediately. At ISU all the permanent brick and stone buildings on central campus are of reinforced construction and offer good shelter.
- If you live in University Housing be sure to review the Storm Protection information you have been provided.
- Tornadoes are spawned by severe thunderstorms, and are only one of the thunderstorms hazards. Lightning is the worst killer. Stay indoors and away from conductive surfaces, such as appliances and water pipes, while the storm is overhead. If you are caught outside, keep yourself lower than, and a safe distance from, the nearest high conductive object.
